

RUBBER 729 ENERGY STORAGE

What is the difference between 729-08 and es rubber? 729-08 ES has the same topsheet as the original 729-08 rubber. It comes in three sponge hardness-45,47,and 49. The ES sponge is more springy than that of the original 729-08. In terms of spin and control, there's little difference between ES and the original. Both aspects of the ES rubber are amazing.

Is friendship 729-08 es rubber good? Friendship 729-08 ES rubber is very cheap however it is very controlled and very spinny. I will keep using this rubber on my backhand for a long time. My games have been improved lots since I use Friendship 729-08 ES rubber on my backhand.

How many users use friendship 729 729-08 es? There are 2 users using the Friendship/729 729-08 ES. Energy Storage (ES) Technology Reviews (14) Friendship/729 729-08 ES vietma on 5/8/2014 I have been using Friendship 729-08 ES on my backhand for quite a while. I really love this rubber. With this rubber, I could loop every ball on my backhand regardless short or long ball.

Facts: black rubber, 2 mm thick, the 46 degree sponge is under a lot of tension. (- and seems a little softer to me!) The rubber was sealed airtight in foil and had a total weight of 62 grams. ???

rubber has three different sponge hardness-45, 47, and 49. I use 47 degrees hardness on a Carbonado 90 as FH rubber. The rubber surface is very tacky with amazing spin potential and great control. I can easily impart strong ???
