

RUSSIA DRAGONFLY ENERGY

Is Dragonfly a Russian espionage group? Dragonfly is a cyber espionage group that has been attributed to Russia's Federal Security Service (FSB) Center 16.

Did 'dragonfly' break into US energy companies? The threat was first described in a report last year by researchers at Symantec who singled out ???Dragonfly???, a sophisticated group of hackers supported by the Kremlin. In some cases, Dragonfly successfully broke into the core systems that control US and European energy companies, Symantec revealed.

Can dragonfly sabotage energy facilities? ???The Dragonfly group appears to be interested in both learning how energy facilities operate and also gaining access to operational systems themselves, to the extent that the group now potentially has the ability to sabotage or gain control of these systems should it decide to do so.

What does dragonfly do? Dragonfly has identified and browsed file servers in the victim network, sometimes, viewing files pertaining to ICS or Supervisory Control and Data Acquisition (SCADA) systems. Dragonfly has obtained and used tools such as Mimikatz, CrackMapExec, and PsExec. Dragonfly has dropped and executed SecretsDump to dump password hashes.

What vulnerabilities does dragonfly use? Dragonfly has exploited CVE-2011-0611 in Adobe Flash Player to gain execution on a targeted system. Dragonfly has exploited a Windows Netlogon vulnerability (CVE-2020-1472) to obtain access to Windows Active Directory servers. Dragonfly has used VPNs and Outlook Web Access (OWA) to maintain access to victim networks.

RUSSIA DRAGONFLY ENERGY

Did 'Dragonfly' attack ICS & SCADA? The trio allegedly spent 2012 to 2014 working on a project code-named "Dragonfly" during which a supply chain attack targeted updates of industrial control systems and supervisory control and data acquisition systems (ICS and SCADA).
