

# RÃ©UNION MMM ENERGY

Can Reunion Island achieve energy autonomy by 2030? Reunion Island,a French overseas region located in the Indian Ocean,is facing a three-fold challenge combining demographics,the environment and energy. To limit its heavy dependence on imported fossil fuels,Reunion Island aims to achieve energy autonomy by 2030based on greater energy efficiency and renewable energy alternatives.

What is green energy revolution Reunion Island? Until recently,Reunion Island had implemented the GERRI project,Green Energy Revolution Reunion Island. This economic and social development program centered on the sustainable development of Reunion Island and resulted from the ???Grenelle Environment??? French environment roundtables.

Can geothermal energy be developed on Reunion Island? Geothermal energy also presents significant potential for development,with an installed capacity of 30MW; however,the main problem for this resource on Reunion Island is its location in a protected natural area.

Does Reunion Island use fossil fuels? Whereas in the 1980s all of the energy produced on Reunion Island came from renewable hydroelectricity,the island has gradually become dependent on imported fossil fuels.

Is biomass a viable energy source for Reunion Island? The development of biomass on Reunion Island is economically more viable. By 2030 in the transition scenarios,electricity from biomass has advantageously replaced electricity from coal and represents slightly more than 50% of electricity generation.

# RÃ©UNION MMM ENERGY

What does MMM do? True to its Vision and with the intention of accelerating the adoption of hydrogen as this new energy vector of our society, MMM is promoting new technologies to bring the future closer. Our Energy division delivers to the market specific, scalable and cost-competitive solutions to achieve this goal.

Wir haben die Energie, die Sie in die Zukunft bringt. Als einer der führenden Versorgungspartner für Wärme und Mobilität stehen wir für eine moderne Daseinsvorsorge mit umfassenden, effizienten Energiesungen.
