

R&C UNION SOLAR TURBINE INC

Can Reunion Island achieve energy autonomy by 2030? Reunion Island, a French overseas region located in the Indian Ocean, is facing a three-fold challenge combining demographics, the environment and energy. To limit its heavy dependence on imported fossil fuels, Reunion Island aims to achieve energy autonomy by 2030 based on greater energy efficiency and renewable energy alternatives.

What is green energy revolution Reunion Island? Until recently, Reunion Island had implemented the GERRI project, Green Energy Revolution Reunion Island. This economic and social development program centered on the sustainable development of Reunion Island and resulted from the ???Grenelle Environment??? French environment roundtables.

Can geothermal energy be developed on Reunion Island? Geothermal energy also presents significant potential for development, with an installed capacity of 30MW; however, the main problem for this resource on Reunion Island is its location in a protected natural area.

Is Reunion Island a renewable resource? Hydroelectricity is the island's main renewable resource. It accounted for 17,2% of its total electricity production in 2015 (133,6MW of installed capacity), spread over six sites in the eastern part of the island. An additional capacity of 50MW should be deployed by 2030. Reunion Island's biomass potential is considerable.

Where are photovoltaic power plants located in Reunion Island? With a 36,8 MW installed capacity in 2021, Albioma is the leading producer of photovoltaics in Reunion Island. These photovoltaic power plants are all located in areas where there is no conflict of use, such as La Star, which was built on a landfill site that was still in operation.
