

SABSON ENERGY AMERICAN SAMOA

Where does American Samoa get fuel? Fuel for American Samoa comes from Singapore with Busan, South Korea as an alternate provider if needed. In the case of fuel disruption, Pacific Energy prioritizes serving ASPA to ensure power and water treatment services are not interrupted (Pacific Energy representative, personal communication, August 9, 2023).

Is American Samoa a renewable country? American Samoa's energy sector relies almost entirely on imported fossil fuels, although renewables represent a small but growing power system contribution. The territory possesses substantial solar energy resources, as well as wind and biomass resource potential.

What kind of energy does American Samoa use? American Samoa uses imported fossil fuels for almost all of the territory's energy needs, including transportation, drinking and waste water treatment, and most (about 97% in 2020) of its electric power generation. Electricity prices in American Samoa vary with world petroleum prices.

How much solar power does American Samoa have? In 2021, solar power accounted for about 11% of American Samoa's electricity generating capacity. American Samoa is less than 1,000 miles south of the equator and has abundant solar energy resources.

When did American Samoa adopt its emergency energy conservation plan? American Samoa adopted its Emergency Energy Conservation Plan in 1982 (see Chapter 5, Annex A of ASCA 12 for plan details). 1981: Title 12 ASCA establishes ASPA, creating an institutional structure for the generation, transmission, distribution, and sale of electric power within American Samoa.

SABSON ENERGY AMERICAN SAMOA

Does American Samoa produce crude oil? American Samoa does not produce or refine crude oil and depends on imported petroleum products. 33 Refined petroleum products, primarily diesel fuel used for electricity generation and marine transportation, arrive in tankers that unload at a terminal and tank farm adjacent to the main harbor at Pago Pago.
