Energy from the sun is absorbed and used to heat things like water. The hot water can be used directly or it can be used to create steam to drive a small turbine which generates electricity. There are not many working examples of this in Australia but there has been a lot of research into it. St. Lucia Electricity Services Ltd P. O. Box 230

On the heels of COP29, Saint Lucia's ambitious climate commitments are again in focus. The island has positioned itself as a regional leader in the fight against climate change, with its 2023-2030 National Energy Policy (NEP) setting an aggressive target of 50% renewable energy by 2030.
