

SAINT MARTIN STORAGE EU

Does Sint Maarten have a trade regime with the EU? The trade regime with the EU is defined by the DOAG and Sint Maarten's associated status as an OCT. Several islands in the Caribbean have already started using alternative energy sources in order to generate energy. Sint Maarten can benefit also from lessons learned of existing initiatives.

How does the EU help Sint Maarten? This budgetary aid comes on top of the Dutch-funded reconstruction Trust Fund (EUR 470 million, implemented by the World Bank). EU interventions have to stand in synergy with Dutch initiatives to avoid overlaps and redundancies. Sint Maarten will be eligible for the European programme for environment and climate (LIFE) 2021-2027.

How can Sint Maarten move towards a resilient energy infrastructure? By leveraging smart metering infrastructure, cloud-based controls and better distributions systems, Sint Maarten could start moving towards an energy infrastructure that provides a resilient adaptation to projected future climate impacts and hazards.

Is it good to live in Saint-Martin? Saint-Martin, located in the Northern part of the island and being a French overseas department, has a population of 36,000 and is approximately 6700 km away from Paris. Despite its rich biodiversity that can help boost tourism, the industry in Saint-Martin, mainly construction, is relatively weak and poorly structured. The island was recently devastated by hurricane Irma and needs to rebuild its key infrastructure.

Why are energy costs a problem in Sint Maarten? On a macro-economic level, energy costs are of great concern for the Government of Sint Maarten. There is a heavy dependency on imported oil and the related vulnerability as this causes an upward pressure on inflation (higher cost of living and doing business) and affects its competitive position as a country.

SAINT MARTIN STORAGE EU
