

SAINT LUCIA ENERGY STORAGE SILVER PLATING PLANT

How much electricity does Saint Lucia have? LUCELEC has an installed electricity generating capacity of 78.4 megawatts(MW),with peak demand of 60 MW. Most of the island's energy is produced from imported diesel fuel that powers electrical generators. Saint Lucia's electricity rates are more than triple the U.S. average.

Is Saint Lucia reliant on fossil fuels for electricity generation? Like many island nations,Saint Lucia is almost 100%reliant on imported fossil fuels for electricity generation,leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data

Is LUCELEC's metering infrastructure reducing Saint Lucia's electrical losses? Advanced metering infrastructure installed across 20% of LUCELEC's customer base in 2010 reduced technical and nontechnical electrical losses. Despite these efforts,Saint Lucia's transmission losses remain moderately high at more than 9%.

2.1. The energy and data challenges facing Saint Lucia 2.1.1. About Saint Lucia Saint Lucia is one of the six countries that make the Windward Islands and is located in the southern arc of the Lesser Antilles. Saint Lucia is 43 km long with a maximum width of 23 km, covering an area of 617 km², with a population of around 180,000.
