

SEYCHELLES SEMCO ETP RENEWABLES

APPLICATION SCENARIOS

What is Seychelles energy policy? New techniques and technologies will be needed to decarbonise these areas. Seychelles Energy Policy for 2010-2030 recommends a sustainable development of the energy sector focusing on energy efficiency, renewable energy and reducing the dependence on oil to improve energy security. It aims to diversify the energy supply, with a

APPLICATION SCENARIOS

How important are renewables in the energy mix of Seychelles? What is the role of renewables in electricity generation in Seychelles? What are the main sources of renewable heat in Seychelles? Renewables are an increasingly important source of energy as countries seek to reduce their CO2 emissions and dependence on imported fossil fuels.

APPLICATION SCENARIOS

What does the Seychelles government do? The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

APPLICATION SCENARIOS

How is electricity produced in Seychelles? Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

APPLICATION SCENARIOS

What is the 'baseline scenario' for energy in Seychelles? So far, the baseline scenario for energy in Seychelles is of slow, incremental addition of RE production, that will likely meet the modest 5% RE by 2020 but will struggle to meet the 15% by 2030 target without substantial changes to overcome technical, institutional, regulatory and financial barriers.
