Storage Battery Cable Wiring Harness for Energy Storage System * The connector's design incorporates an integral latching system that ensures a definitive electrical and mechanical connection. * Connector housings are made of a thermoplastic material that is durable and has excellent mechanical properties and meet RoHS compliant.

A novel device architecture of a coaxial supercapacitor cable that functions both as an electrical cable and an energy-storage device is demonstrated. The inner core is used for electrical conduction and the overlying layers are used for energy storage. This unique design provides excellent flexibility, long and stable cycle lifetimes, and high energy and power densities.
