

# SLOVAKIA BATTERY STORAGE FOR BUSINESS

How long will a gas storage facility last in Slovakia? Its construction should last about one year. The current underground gas storage capacity in Slovakia is about 3 billion cubic metres. The existing facilities are operated by companies Nafta and Pozagás. Another locality suitable for construction of a gas storage facility is in Púchov in eastern Slovakia.

Will Slovakia become a leader in the e-mobility sector? ???Exciting to be involved in a new era for Slovakia, becoming a leader in the battery sector to clean energy and e-mobility,??? adds InoBat CEO Marian Bo???ek. ???GIB???s ? urany factory will be among the largest and most innovative of its kind in the world.

Did Slovakia sign a joint venture agreement with the government? The government and joint venture have now signed an Investment Agreement. The agreement does not come as a surprise. In November 2023, the companies signed a letter of intent to this effect with the Slovakian government regarding the factory. The partners had already presented the key points of the joint factory in September.

Energy storage facility of a cumulative installed capacity of 384 MW, storage capacity allowing a net annual electricity generation of 250 GWh. (~32-64MW) located in Slovakia (central Europe). Considering energy density, charge and discharge efficiency, life span, and ecofriendliness of devices, the battery storage shall be based on Lithium

The first smart battery storage system brAln with a capacity of 432 kWh is officially working and is already achieving excellent results. Although similar high-capacity batteries exist in neighboring countries, this is the first smart solution of its kind in Slovakia.
