

SMART SOLAR USA PHILIPPINES

What is the Philippines Smart Solar Network project? The Philippines Smart Solar Network project is developed through the installation of smart grid controllers in combination with off-the-shelf solar and battery storage components. The pilot phase of the project involved the installation of a smart solar network in San Isidro, Busuanga, Palawan, which currently provides energy to 62 households.

How will smart solar work in the Philippines? The project works in partnership with the local community to install, operate and maintain smart solar network systems that will generate and distribute electricity to households, small businesses and community centers in the Philippines??? off-grid communities, many of which will be receiving first-time, affordable and reliable clean energy.

Does solar up Philippines offer a green financing program? In an effort to make solar energy more accessible to Filipino households, Solar Up Philippines has teamed up with Sterling Bank of Asia to introduce a Green Financing Program. Picking a solar panel installer is a big decision that can impact your savings and experience. Find out how you can choose wisely.
