

# SMARTEST ENERGY NAURU

Does Nauru have energy resources? Nauru, like most Small Island Developing States (SIDS) in the Pacific region, has scarce local energy resources limited to solar energy and biomass and imports most of the energy consumed from abroad. To address this, the country has started the Supporting Mainstreamed Achievement of Roadmap Targets on Energy in Nauru project.

What is Nauru energy roadmap 2018-2020? The project aims to increase the use of feasible renewable energy and energy efficiency technologies to support socio-economic development in Nauru in accord with the country's energy roadmap targets outlined in the Nauru Energy Roadmap 2018-2020.

Who is SmartestEnergy? SmartestEnergy is a people-powered energy company on a mission to empower a greener generation. We work with C&I customers, small to medium businesses, generators, brokers and trading counterparties across our four global businesses to drive the net zero transition in the UK, US and Australia.

What makes SmartestEnergy unique? "SmartestEnergy really stood out as not only having a brilliant renewable energy product at a competitive price but also a proactive, adaptable and cost-effective management process."

How can SmartestEnergy help a switched-on business? The images are further optimised, smaller and we've turned off autoplay videos which all decreases page size and saves carbon. We help switched-on businesses to make the transition to net zero with our innovative energy solutions. SmartestEnergy is a people-powered energy company on a mission to empower a greener generation.

# SMARTEST ENERGY NAURU

Does SmartestEnergy support generators? In this blog, Angus Widdowson, Head of Generation Sales, shares our growth plans highlighting our efforts to support generators with backing from our parent company, Marubeni. "Flexible purchasing offered by SmartestEnergy has saved the group hundreds of thousands of pounds in comparison with their previous fixed price contract."
