Explore the potential of solar energy in Cyprus, from residential and commercial installations to large-scale solar farms. As the country seeks to reduce its reliance on imported fossil fuels, solar energy offers a local, renewable solution that can meet a significant portion of its electricity demands.

The reason this is important is that it might limit the possible size of the installed system. If you have 1-phase, the limit you can install is 4,15kwp If you have 3-phase, the limit you can install is 10,4kwp As 4,15kwp is not enough for most people to cover their electricity consumption, it is likely that you will need to update your house to 3-phase electricity before you can install a
