Lithuania's renewable energy targets, particularly in solar PV, have exceeded expectations. with 1.2 GW of total solar capacity already installed, surpassing the 2025 goal. The. government has set more ambitious targets of 2 GW by 2030, with revised NECP drafts. aiming for a 500% increase to 5.1 GW. The nation aims for energy independence

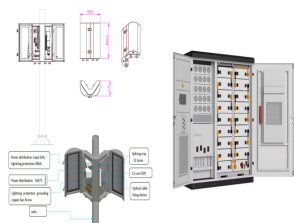

Laid out in Section 48 of the U.S. tax code, the ITC for businesses provides an incentive for investing in clean energy -- one of the key incentives is a dollar-for-dollar tax credit based on the cost of your solar panel system.. Through the Inflation Reduction Act of 2022, the ITC was set to 30% of the cost of the system, and extended until 2034.

The new plant, once in operation, will expand the Danish solar company's portfolio in Lithuania to 180 MWp, according to a press statement on Thursday. The project comes on the heels of the Moletai scheme, which was Nordic Solar's first investment in Lithuania and also became the country's largest solar farm.
