A balcony power plant automatically helps reduce your electricity costs. For example, if you opt for a balcony power plant with two 400-watt solar panels, an 800-watt Balcony Power System, and a DELTA 2 power station, you save well over 200 pounds a year. And, even without a power station, the savings are still noticeable.

Solar panel prices have also dropped consistently over the past decade along with the advent of various solar panel grants and schemes that help you ease the purchase and installation costs. It's an ideal time to buy new panels, especially if you plan to keep living costs down, as they can alleviate more than ?1,005 annually on your electricity bills in some cases (assuming they ???

Assuming an efficiency of 20% for monocrystalline solar cells, I could produce up to 240 kWh per m<sup>2</sup> and year. A two-panel setup will be more suited for me, a modern panel in the power range of 320 to 370 Wp has a usable area of around 1.6 m<sup>2</sup>. So, a yearly harvest of almost 770 kWh should be possible from two panels.
