Who installed the largest commercial solar installation in Jersey? SunWorks was contracted by Jersey Electricity to install the Channel Islands' largest solar installation at Jersey Dairy, a total of 1,516 Solar panels. This saw the start of JE's lease scheme for commercial building owners and enabled SunWorks to deliver a world-class commercial solar installation in Jersey.

What happened to solar in Jersey (at SunWorks)? Despite the global Pandemic, solar continued to grow at SunWorks in Jersey. In 2021, the company moved its headquarters to St Helier Business Park and was able to install solar panels there.

Why is solar important in Jersey? Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

How much does solar cost in New Jersey? Interested in going solar? You'll need to install a 12.27 kW solar panel system to cover the average electric bill in New Jersey, which will cost you about \$22,410 after the federal tax credit. As long as your federal tax bill is high enough, you can take advantage of the federal investment tax credit (ITC).

How long does a solar system last in New Jersey? That's why over 28,000 New Jersey homeowners have used EnergySage to receive and compare quotes for solar installations. You can expect to earn back your initial solar investment through electricity savings in about 6.18 years, while most systems last at least 25 years. You'll often see this number referenced as your solar payback period.

How much do solar panels make in New Jersey? New Jersey has some local incentives as well, like the Successor Solar Incentive (SuSI) Program, New Jersey's solar renewable energy credit (SREC) program. Under this program, you can earn \$85 for every megawatt-hour (MWh) of clean electricity your panels produce. For example, if you produce 10 MWh of electricity annually, you'll earn \$850 a year.
