

SOLAR SUPPORT SPAN

Does span work with a solar inverter? SPAN may be paired with any grid-tied solar inverter. No communication wiring is required between SPAN and solar systems without battery backup. The circuit breaker feeding the solar inverter must be installed in your SPAN Panel to allow SPAN to monitor your solar production. SPAN is currently compatible with the following battery storage systems.

What battery integrations does span offer? SPAN's current battery integrations include SolarEdge Energy Hub, Tesla Powerwall (Powerwall 2, Powerwall 3, Powerwall+), FranklinWH aPower (with aGate), and Enphase IQ Batteries via SPAN Remote Meter Kit. We are continually working to expand our integrations to support more storage systems in the future.

Where can I find information about my solar installer? Details for your SPAN-Authorized installer can be found on the SPAN Tech Portal. Keep in mind that your solar and storage systems must be added to SPAN by your installer or, for SolarEdge and Tesla Powerwall 2 or Powerwall +, by SPAN Support.

Do I need a span-authorized installer to install a battery storage system? As part of the installation with battery storage systems, SPAN requires either a wired communications connection to the battery system (SolarEdge, Tesla, FranklinWH) or a SPAN Remote Meter Kit (Enphase) to ensure robust functionality during an outage. Details for your SPAN-Authorized installer can be found on the SPAN Tech Portal.

How can span help you reduce your energy bill? SPAN intelligence automatically finds ways to lower your energy bill. Unparalleled visibility Manage energy costs, circuit by circuit from the SPAN Home App. Seamless installation Connect with category-leading storage systems and legacy hardware. Smarter energy, big savings Energy insights for savings

SOLAR SUPPORT SPAN

What is SPAN panel? ???A long-overdue, borderline genius product that puts much-needed control back into the hands of homeowners.??? SPAN Panel replaces your existing electrical panel and turns any home into a smart home. Save on energy SPAN intelligence automatically finds ways to lower your energy bill. Unparalleled visibility

The solar system has not yet been added to the SPAN configuration by a SPAN-authorized installer or SPAN Support; The solar breaker was labeled as a regular branch breaker instead of added to your SPAN ???

Charge with solar is a feature that allows homeowners with both a SPAN Drive and solar to charge their electric vehicle with solar electricity. This is excess solar production that would normally be sent back to the grid. How do I enable charge with solar? The charge with solar feature can be enabled via the SPAN Home App as follows:

The SPAN Remote Meter Kit monitors Enphase AC batteries, solar output, and energy use beyond the SPAN Panel. This compact device measures electrical parameters at the grid disconnect point and relays data to the SPAN Panel. The Enphase IQ Battery will be the first storage system supported with the SPAN Remote Meter Kit. Other AC battery systems

Is there a manufacturer that has a solar mounting rail that can span almost 15 feet? Bluedog225 Solar Wizard. Joined Nov 18, 2019 Messages 3,798 Location Texas. Sep 21, 2022 common sense regular solar panel rails cannot support 15 feet gap. You will need to make trusses to span that gap, then use regular rails between these trusses.

The quality of your solar panel installation matters to us and that's why our design and installation is industry leading. As the highest rated solar company in the Midwest, our work speaks for itself. SPAN is the smarter electrical panel that gives you complete control over your home's energy

The SPAN Home App displays solar production data when a solar system is successfully added to the SPAN configuration by an authorized SPAN installer or SPAN Support. When a solar system is added, the yellow sun icon in the Home app will turn from gray to yellow and show live solar production values.

SPAN Panels replace your existing electrical panel to become the central energy management system for your home. SPAN Products are controllable via the SPAN Home App. Is SPAN a good match for my new construction or retrofit project? SPAN Panels are designed for installation flexibility and work well for both new homes and retrofit projects.

The second-best option would be to have SPAN installed before solar and battery backup systems. SPAN could be installed after the solar and battery system, but please note this would likely require more work to move loads around. As you plan, please consult this FAQ article for the most up-to-date list of storage system integrations: What Solar

Smart monitoring & controls at circuit-level for your home loads, solar, batteries, EVs; Fully customizable backup to extend your home battery power in an outage; Streamlined design for fast installation and fewer boxes on your wall; Check out the above video to get started with SPAN.
