

SOLARUS RENEWABLES SOUTH SUDAN

How long does solar energy last in South Sudan? Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

Which solar energy options are available in Sudan? In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

How solar energy can transform South Sudan's economy? A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

Why is solar energy important in South Sudan? As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

Who is Solarus renewables AB? Solarus Renewables AB is world leading in the development of photovoltaic thermal solar collectors (PVT). Solarus Renewables AB was founded in Sweden in 2017. Solarus Renewables AB is established with direct or indirect ownership in seven different companies in four countries Sweden, USA, The Netherlands and South Africa.

SOLARUS RENEWABLES SOUTH SUDAN

Does South Sudan have electricity? The war has destroyed South Sudan's limited infrastructure, triggering an economic implosion. What electricity it has and it is the least electrified country in the world depends entirely on imported diesel to run generators.
