

ST KITTS AND NEVIS THE SUN AND SOLAR PANELS

Does St Kitts and Nevis have a national energy policy? Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

How much solar energy does St Kitts use? In St. Kitts and Nevis, the solar resource averages 5 kWh per square meter. Solar energy is already being used for grid-powered induction lighting and street lights along roadways. A 7 MW waste-to-energy power plant is planned to come online on St. Kitts in 2015.

How much does electricity cost in St Kitts & Nevis? The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

What is the largest solar project in the Caribbean? In September 2019, the Federal Government in collaboration with SKELEC signed an agreement with Leclanché SA, one of the world's leading energy storage companies based in Switzerland, to construct the largest solar generation and energy storage project in the Caribbean.

Over the past several years, St. Kitts and Nevis has implemented several energy efficiency and renewable energy projects. In 2014, a light bulb exchange program was launched to replace existing residential lighting with 323,000 LED bulbs at a cost of roughly \$2.5 million; the manufacturing sector underwent a comprehensive energy audit; and
