

STINGRAY ENERGY SYSTEMS UKRAINE

Is Russia destroying Ukraine's energy infrastructure? One of the main targets of Russia's ongoing attacks on Ukraine is the energy infrastructure. The extent of the destruction is enormous. One year after the start of the war in February 2022, 76 percent of thermal power plants had been destroyed; now the figure is 95 percent, says Ukrainian scientist Iryna Doronina.

What is happening in Ukraine's energy system? Despite this, nuclear, hydropower, and newly constructed renewable projects continue to provide critical electricity. International partnerships have been pivotal in rebuilding Ukraine's energy systems. Companies such as GE Vernova and Honeywell are collaborating with DTEK on wind and battery storage projects.

Are Ukraine's power plants being attacked? The corresponding findings, to which researchers from the Technical University of Munich and the University of Bayreuth also made valuable contributions, have now been published in Joule, a leading journal for energy research. We've established that practically all Ukraine's large, centralised power plants have been attacked since February 2022.

Can a solar PV-plus-storage system improve resilience in Ukraine? NREL is working with USAID, the Ministry of Energy of Ukraine, and the Ministry for Communities, Territories, and Infrastructure Development of Ukraine to design a microgrid pilot project that will demonstrate how a solar photovoltaic (PV)-plus-storage system could enhance resilience under the present conditions in Ukraine.

When will wind resource data be added to Ukraine? Critically, wind resource data is anticipated to be added for Ukraine by early 2024. Ukraine 4-km solar resource data, available on the RE Data Explorer platform. Illustration by Billy Roberts, NREL

STINGRAY ENERGY SYSTEMS UKRAINE

Ukraine's energy landscape has been profoundly impacted by the ongoing conflict, with extensive damage to infrastructure and a historical reliance on Russian imports for traditional energy sources like coal, gas and nuclear fuel. Rebuilding the centralized, Soviet-era energy system is no longer a viable option.

Stingray Energy | LinkedIn ????????? 2,512??? | Stingray Energy Services provides a full suite of high quality rental equipment in the Appalachian Basin region. In addition to rentals we create a safe culture and a high level of execution in providing fresh water transfer, produced water filtration and re-fueling operations in support of drilling, completion, and production activities.

DTEK Group, a private investor in Ukraine's energy sector, has announced a ???140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a combined capacity of 200MW. The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system.

1 ? To protect energy infrastructure, Ukraine needs 19 more air defense systems. NATO Secretary General Mark Rutte said this during a press conference with Ukrainian leader Volodymyr Zelenskyy in Brussels.. Rutte noted that he will first hold a bilateral meeting with Zelenskyy in Brussels, after which other European leaders will join him.

4 ? The IEA's latest report, Empowering Ukraine through a Decentralised Energy System, outlines a pathway to rebuild and modernise Ukraine's power sector amid ongoing attacks on its energy infrastructure. Since Russia's full-scale invasion of Ukraine in February 2022, nearly two-thirds of Ukraine's dispatchable power capacity has been occupied, damaged, or destroyed.
