Now people can use the PV array that they already paid for to create backup power when the grid goes down. This simple, clean, scalable approach has many advantages over generator and AC coupled solutions." ??? Sequoya Cross, CEO, Backwoods Solar. Most grid-tied solar systems will not receive power from their PV arrays during a grid failure.

Our task? to use the most dependable solar goods to fuel a more promising and sustainable future. We produce solar panels that adhere to strict durability requirements. Long-term savings are the goal of our product design. Streets and public areas are illuminated by our solar street lights. They provide dependable solar-powered illumination.

These lands invite adventurers to embark on an Arctic expedition, witnessing the wonders of nature in its purest form, leaving an indelible mark of awe and reverence for the

I attached a diagram maybe you didn't look at it first post. Yes, the inverter grid input will be connected to Grid power. The outputs of the inverter will be going to a manual Transfer switch where I can direct power to 2-3 circuits in my home from the grid power, or inverter power. I can also change which circuits are on the inverter.
