

THE LATEST OSLO POLICY REGULATIONS FOR ENERGY STORAGE PROJECTS

Is there a full-scale CO₂ management project in Norway? Various governments have worked to realize a full-scale project for capture, transport and storage of CO₂ (CCS) in Norway. The Norwegian Parliament approved the full-scale CO₂ management project in Meld. St. 33 (2019-2020) Longship - capture, transport and storage of CO₂ in 2021. The Longship project will be completed in 2025.

Does Norwegian CCS project include CO₂ storage? The Norwegian full scale CCS project, Longship, includes a CO₂ storage with a substantial capacity beyond what is necessary for the Norwegian capture projects in Longship. Thus, other industrial actors can capture and store CO₂ without investing in the development of another CO₂ storage.

How does Norway support foreign projects? Norwegian support of foreign projects takes place in cooperation with other countries and through existing programs and institutions. Norway, through the Ministry of Petroleum and Energy, The Research Council of Norway and Gassnova, are represented in almost all relevant international bodies who work on CCS.

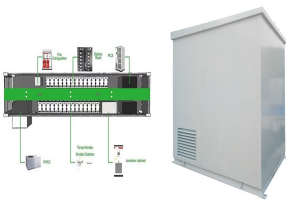

The bankability of the revenue streams of energy storage projects is a key concern for private sector funders. Revenue streams do not typically match the tenor of the financing required by an energy storage project and the ???
