

## THE MARSHALL ISLANDS HAS HIGH REQUIREMENTS FOR NEW ENERGY STORAGE

How will the Marshall Islands achieve a low-carbon energy future? trated by our adoption of a pathway to a low-carbon energy future. In our Nationally Determined Contribution, the Republic of the Marshall Islands has committed to reducing GHG emissions to achieve net zero emissions by 2050, with two significant milestones along the way ??? by 2025 our emissions will be a

How much energy does the Marshall Islands need? Primary Energy. The Marshall Islands relies on imported petroleum to meet 99% of its primary energy needs. In 2016, 1,928 terajoules of petroleum products were imported, of which 65% were used for national energy needs and 35% for international fuel bunkering.

What will the Marshall Islands achieve by 2020? These projects will contribute to achievement of the government???s target of 20% of electricity generation from renewable energy sourcesby 2020 (the World Bank estimates that with the completion of its proposed 6.8 MW PV investment,the Marshall Islands will achieve 9% electricity from renewable energy sources). 8. Networks.

What is the purpose of the Marshall Islands Electricity Act? of Association) is to provide electrical or energy services to the population. The Marshall Islands is the only country in the Pacific that has no electricity act and therefore legal mandates and clear responsibilities and functio

How can the Marshall Islands improve the quality of life? t renewable energy.IMPROVING THE QUALITY OF LIFE ON OUTER ISLANDSOver the last 15 years, thanks to various development partner projects, the Marshall Islands have connected over 99 percent of households to electricity, across all atolls, by installing stand-alone household systems on outer island

## THE MARSHALL ISLANDS HAS HIGH REQUIREMENTS FOR NEW ENERGY STORAGE

What fuel does the Marshall Islands import? ation turbine fuel and household kerosene),and liquefied petroleum gas (LP). In 2011,the Marshall Islands imported 56 million liters of petroleum fuel. The Marshalls Energy Company (MEC) and Mobil are the main importers,with MEC having very large storage capacity. Based on information for the years 2007 to 2011,

Several review papers on island systems include storage-related aspects as a side topic. Specifically, the review of [26] recognizes the storage technologies proposed for specific ???

This energy snapshot was prepared to support the Energy Transition Initiative, which leverages the experiences of islands, states, and cities that have established a long-term vision for ???

Building and maintaining renewable energy in the Marshall Islands will help create jobs and improve the health of the population. Renewable energy systems will allow for more affordable and safer access to electricity.

The shift to renewable energy in the Pacific island countries has progressed, and was initiated with the participation of Fiji, Tuvalu, Kiribati, the Federated States of Micronesia (FSM), and the Marshall Islands. "We place ???

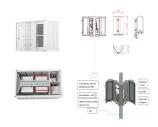

## THE MARSHALL ISLANDS HAS HIGH REQUIREMENTS FOR NEW ENERGY STORAGE

This diversification will help stabilize energy costs for customers over the long term, reducing the islands" dependency on expensive imported diesel fuel that has historically driven up electricity bills. The new renewable ???

David Paul, Marshall Islands minister for environment, launched the Marshall Islands Electricity Roadmap at the global climate summit COP24 in Poland on Dec. 11. Dubbed "Tile Til Eo," which means "Lighting the Way" in ???
