Another issue is energy storage maintenance. Depending on the energy storage technology, some solutions require a great deal more upkeep and regular maintenance to remain effective solutions. This can drive up overall costs and create additional expenditures where there weren't any previously. Lastly, how do we define energy storage?

The Energy Storage Summit is the ultimate meeting hub for the entire Energy Storage ecosystem. We connect everyone; with 450+ investors, developers, storage solution providers, DNOs, aggregators, system integrators and software companies expected we will discuss what is needed to help with the adoption of energy storage in the industry.

The Energy Consortium was founded in Dec 2021 with a bold vision: to enable India's journey towards a low carbon energy future. In this short span, we have ten global energy majors, that include those in hard to abate and hard to electrify sectors as well as those at the forefront of leveraging digital means for energy transition, collaborating with us.
