

# TRILLION-LEVEL ENERGY STORAGE TRACK

## EQUIPMENT MANUFACTURING

How much money has been invested in energy transition technologies? It found that total investment in energy transition technologies including renewables,hydrogen,electric vehicles (EVs) and carbon capture and storage hit record levels last year,with US\$1.77 trilliontotal investment,a 17% increase from 2022.

Why are energy storage technologies important? They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council (CEC) released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

How many electrochemical storage stations are there in China? In terms of developments in China,19 members of the National Power Safety Production Committee operated a total of 472 electrochemical storage stationsas of the end of 2022,with a total stored energy of 14.1GWh,a year-on-year increase of 127%.

Will the energy storage industry thrive in the next stage? The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

What is Nanjing's grid-scale energy storage station? The grid-scale storage station in Nanjing is an epitome of China's prospering energy storage industryas the country has put the emerging industry on a pedestal.

How many electrochemical storage stations are there in 2022? In 2022, 194 electrochemical storage stations were put into operation, with a total stored energy of 7.9GWh. These accounted for 60.2% of the total energy stored by stations in operation, a year-on-year increase of 176% (Figure 4).

As per global energy storage market demand, research data shows that in 2022, global energy storage lithium battery shipments exceeded 150GWh. This number is expected to exceed 570GWh by 2025 and reach 1430GWh by 2030, ???

Pan Fusheng leads the Chongqing Institute of New Energy Storage Material and Equipment lab. (Photo/ Zhao Peng) The advanced materials sector is pegged as a driver for various industries under the "33618" modern ???

The CEO-led organisation was launched at COP26, including BP and Breakthrough Energy Ventures among its founder members, alongside 16 long-duration energy storage (LDES) technology providers, industry off-takers ???

It found that total investment in energy transition technologies including renewables, hydrogen, electric vehicles (EVs) and carbon capture and storage hit record levels last year, with US\$1.77 trillion total investment, a ???
