Based on the aim of improving the system efficiency and reducing the balance-of-system costs, Trina Solar's research and development team has introduced an innovative design of low-voltage and higher module string power output. Typically, Trina can interconnect 33 Vertex modules into a string. Compared with other reference module, a single

Founded in 1997, Trina Solar is the world's leading total solution provider for solar energy. With local presence around the globe, Trina Solar is able to provide exceptional service to each customer in each market and deliver our innovative, reliable products with the backing of Trina as a strong, bankable brand. Trina Solar now distributes its PV

Trina Solar 415W is a PV module that uses 144 half-cut cells manufactured using proven by time technologies. The model's reliability, high efficiency, PID resistance and high wattage make it a good choice for commercial and industrial use, but residential clients can also reap the benefits it has to offer.

Von Bloomberg New Energy Finance als einer der weltweit vertrauenswürdigsten Hersteller von Solarmodulen eingestuft, ist Trina Solar der Anbieter, den Sie sich für Ihrer Solarmodule wünschen.

Based on Trinasolar's leading multi-busbar technology, the Vertex modules adopt the 210mm silicon wafer, non-destructive cutting and high-density interconnect technologies, which together allow it to reach 670W power output and 21.6% module efficiency.

According to Intertek-conducted IEC 61701:2011, salt mist corrosion
 testing of photovoltaic (PV), Trina Solar modules can be safely installed in
 corrosive salt areas within proximity of the ocean or sulfurous areas.
 Panels are not subjected to wind or snow loads exceeding the maximum
 permissible loads, and are not subject

Trina Solar Panel Range. Trina Solar manufactures an extensive range of
 solar panels for residential, commercial and utility-scale installations,
 incorporating many of the latest cell technologies, including multi-busbar
 PERC cells, large 210mm third-cut cells, and, more recently, the
 high-density panel format with N-type TOPCon monocrystalline cells.

Leader nel solare mondiale. Trina Solar produce pannelli fotovoltaici di
 alta qualit? dal 1997. Siamo uno dei principali fornitori al mondo di sistemi
 solari, abbiamo consegnato oltre 17 gigawatt in tutto il mondo, fornendo
 energia ad abitazioni, aziende e centrali energetiche di tutto il mondo.

The large-format Vertex N series modules, featuring a high power and low
 voltage design, serve to minimize both the balance of system cost and the
 LCOE, which highlights the exceptional advantages of the 210N
 large-sized modules in utility-scale solar projects.

TRINA PHOTOVOLTAIC PANEL 680

Thus, the panel generates more energy overall. Learn More. Lower degradation means a higher return on investment. With a guaranteed low degradation in the first year, the N-type has a lower LCOE (levelized cost of energy), to meet a wide range of needs. meaning higher efficiency, as well as lower degradation, more yield. Back-side power
