

How important is natural gas in Trinidad & Tobago's energy mix? While natural gas will continue to play a significant rolein Trinidad and Tobago???s energy mix,there is a critical need to accelerate the transition towards renewable energy sources. The study illustrated that natural gas used for petrochemical production has a value of three times more when used for electricity generation.

Why should Trinidad and Tobago invest in solar and wind energy? Leveraging the country???s potential in solar and wind energy not only reduces carbon emissions and aligns with global sustainability goals but also increases economic growth by ensuring natural gas is used for higher-value products. The largest importer of Trinidad and Tobago???s LNG is the US.

How many methanol plants are there in Trinidad and Tobago? Trinidad and Tobago has a total of seven Methanol plantswith a total annual capacity of 6,620,000 MT per year. During the period January 2022 to September 2023,the Titan Methanol plant did not produce any methanol as it had been mothballed since 2020 due to natural gas production curtailment and difficulties with the natural gas supply contract.

What happened to Titan methanol plant in Trinidad and Tobago? During the period January 2022 to September 2023,the Titan Methanol plant did not produce any methanol as it had been mothballedsince 2020 due to natural gas production curtailment and difficulties with the natural gas supply contract. Table VI provides details on the Methanol plants in Trinidad and Tobago. Table VI.

How much power does Trinidad & Tobago produce? Under normal operating conditions, all of Trinidad and Tobago???s power generation is based from indigenous natural gas. Total generation capacity as of 2021 is 2,019 MWon Trinidad and 99.4 MW on Tobago, serving a total peak load of approximately 1,300 MW (55 MW of which on Tobago).

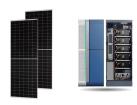

Who imports methanol & ammonia in Trinidad & Tobago? The largest importer of Trinidad and Tobago???s LNG is the US. The largest importers of Trinidad and Tobago???s Methanol and Ammonia have changed over the years during and immediately after the pandemic,and the data reveals that both the Methanol and Ammonia export markets are diverse.
