

TRUCK BATTERY CONVERSION ENERGY STORAGE POWER SUPPLY

What allows heavy-duty truck users to quickly swap batteries? Through this real-time big data platform for battery management and distribution, all heavy-duty truck users can quickly swap batteries at battery-swap stations to complete energy replenishment. Therefore, users don't have to often worry about the headaches of driving range and battery capacity attenuation.

What is a Battery-Swap electric heavy-duty truck? The innovative design concept and operation mode of a Battery-Swap electric heavy-duty truck (BS electric heavy-duty truck) was first introduced by the State Power Investment Corporation Limited (SPIC) in China. This concept involves 'heavy-duty trucks with separable batteries that can be swapped quickly'.

How BS electric heavy-duty truck battery sharing service works? The battery sharing service of the BS electric heavy-duty truck is digitally guaranteed by a set of IoT system developed by SPIC. This system monitors and traces the battery system throughout its life cycle to ensure the safety of battery use.

Why do heavy-duty trucks need a power battery bank? Heavy-duty trucks need a power battery bank to extend the life expectancy of their batteries and improve their overall value across their life cycle. The Power Battery Bank operates and maintains the batteries centrally, providing better longevity and efficiency.

Do BS electric heavy-duty trucks need power batteries? Under the TBS mode, users of BS electric heavy-duty trucks do not need to purchase power batteries. This results in a 50% reduction in the purchase cost compared to purchasing a truck under charging mode with the same specification. Consequently, the purchasing cost of a BS electric heavy-duty truck is equal to that of a fuel heavy-duty truck.

Who proposed the battery-swap electric heavy-duty truck? The innovative design concept and operation mode of Battery-Swap electric heavy-duty truck (BS electric heavy-duty truck), that is, heavy-duty trucks with separable batteries that can be swapped quickly, was put forward by the State Power Investment Corporation Limited (SPIC) for the first time in China.

With over 4 decades of extensive experience in power electronics, EnSmart Power is a leading complete energy storage system provider and specialist in the design and manufacturing of uninterruptible power supplies, ???
