

UNITED ARAB EMIRATES SOUTH KOREA ENERGY STORAGE POWER STATION

Are South Korea and the United Arab Emirates cooperating in nuclear energy? South Korea and the United Arab Emirates have agreed to "deepen and accelerate collaboration in the peaceful nuclear energy sector". Several memorandums of understanding were signed during a meeting between Korean President Yoon Seok-yeol and UAE President Mohammed bin Zayed Al-Nayhan.

Who owns Emirates nuclear power plant? The Emirates nuclear power plant will be operated by a joint venture between Emirates Nuclear Energy Corp. (ENEC) and Kepco. Once all four of the 1,400-megawatt reactors go online, the project is expected to supply 25 percent of the UAE's energy needs.

Where are South Korea's nuclear reactors located? The No. 3 unit is one of the four nuclear reactors being built in Barakah, 270 kilometers west of Abu Dhabi, under a US\$20 billion contract won by a KEPCO-led consortium in 2009. The project marked South Korea's first export of a homegrown commercial atomic power plant.

Where is the Barakah nuclear power plant located? The Barakah nuclear power plant is located in the United Arab Emirates (UAE). KEPCO's Korea's first and only overseas design-build-operate-and-maintain nuclear project has been completed, and it is now up and running, supplying electricity.

How will KEPCO's new nuclear power plant affect the UAE? Once all four of KEPCO's 1,400-megawatt reactors go online, the project is expected to supply approximately 25 percent of the UAE's energy needs. The Korean power supplier also mentioned that carbon emissions will be reduced by 21 million tons, which is equivalent to pollution created by 3.2 million vehicles.

ENERGY STORAGE POWER STATION

When will Korea's Unit 3 power plant start delivering carbon-free electricity? The Unit 3 plant began operations last month and delivered the first megawatts of carbon-free electricity last week, according to the Korea Electric Power Corp. (KEPCO). Its commercial operation is expected to begin next year after further tests, it added.
