

VIETNAM HONEYWELL BESS

Can a Honeywell battery energy storage system be used in Vietnam? First announced at the annual U.S.-Vietnam Energy Security Dialogue, the project plans to use a Honeywell Battery Energy Storage System (BESS) integrated into a 50-megawatt peak solar farm operated by AMI Khanh Hoa.

How does Honeywell's Bess platform improve grid stability & sustainability? Honeywell's BESS Platform improves grid stability and sustainability and decreases costs and carbon footprint by reducing the need for non-renewable baseload power sources. Energy storage plays a critical role in the transition to renewable power generation and the decarbonization of global power systems.

What is Honeywell battery energy storage system? Honeywell Battery Energy Storage System helps decrease costs and carbon emissions while providing grid stability from renewable power sources, enabling the production of green hydrogen at the Tra Vinh green hydrogen plant.

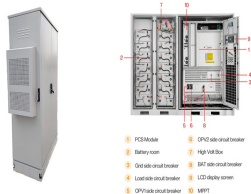

Can battery energy storage be commercially viable in Vietnam? The BESS project aims to demonstrate the commercial viability of battery energy storage in Vietnam and showcase the practical benefits of renewable energy, including its reliability and efficiency. It also seeks to help Vietnam meet its climate action targets.

Is Honeywell a bankable energy storage company? In mid-2021, and Honeywell presented the sponsored webinar, "Bankable energy storage for the Asia-Pacific region" one of a series of three focusing on different global regions which you can watch here. More recently the company has rolled out its own C&I energy-as-a-service offering and is launching its own proprietary flow battery tech.

VIETNAM HONEYWELL BESS

What can Honeywell do for TGS? In addition to BESS, Honeywell will provide extensive solutions and expertise covering the entire hydrogen value chain to help TGS operate safely, profitably, and meet its renewable energy production goals.

Other recently announced project contracts for Honeywell's BESS division include what could be Vietnam's first grid-scale BESS asset, for which the company signed a Memorandum of Understanding in May with Philippines-headquartered developer AC Energy (ACEN), and Vietnam's AMI Renewables.

To scale energy storage initiatives and ensure long-term commitment, Vietnam integrated the BESS pilot project into its national energy transition framework by aligning it with the Implementation Plan of PDP8 and the JETP Scheme. Vietnam's experiment sets a global example, inspiring other countries to advance their own energy transition goals

Steps forward have been taken for the first pilot deployment of large-scale battery energy storage system (BESS) technology in Vietnam, with Honeywell signed up as equipment provider. The project will be a short ???

Co-funded by a \$3 million grant from the US Mission, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate goals. First announced at the annual US-Vietnam Energy Security Dialogue, the project plans to use a Honeywell Battery Energy Storage System ???

An advanced battery energy storage system run by AMI AC Renewables in central Vietnam will be built by U.S. conglomerate Honeywell with a \$3 million grant from the U.S. Mission to Vietnam. Priority programs include supporting BESS developments in Vietnam, and the early retirement of
