

WATER STORAGE LOCATIONS IN ITALY

What are the main water sources in Italy? Italy's water supply infrastructure is well-developed and efficient. The country boasts an extensive network of water sources, including rivers, lakes, and underground aquifers. The primary sources of water in Italy include the Po River, the largest in the country, and Lake Garda, the largest lake in Italy.

Does Italy have a water supply? Additionally, Italy has a network of underground aquifers that contribute significantly to its water supply. The water supply in Italy is managed by various regional water authorities, with each region having its own regulations and policies governing water distribution.

How much water is abstracted in Italy? In 2015, the total volume of water abstracted for public water supply on the Italian territory amounted to 9.49 billion cubic meters, 428 litres per person per day. It is the highest value in the European Union. However, just under half the water abstracted from sources (47.9%) did not reach end users, due to leakages in the supply system.

How safe is Italian drinking water? Ensuring the safety and quality of drinking water is a top priority in Italy. The country adheres to strict regulations and standards to monitor and maintain the quality of its water supply. The Italian Ministry of Health, in collaboration with regional health authorities, sets and enforces these standards.

Which sector uses the most water in Italy? The situation was generally slightly better than in 2016. The agricultural sector is the largest user of water: irrigation accounts for more than 50% of total water use in Italy. The irrigated area can vary considerably, from year to year and across the territory, due to meteorological conditions or the choice of crop.

WATER STORAGE LOCATIONS IN ITALY

How much water is wasted in Italy? These amounted to 42.2% of the volume of water injected in 2020, which is equivalent to a loss of 3.4 billion cubic metres of water each year. In other words, 157 litres of water per inhabitant are wasted every day in Italy, which is equal to the water needs of about 43 million people.

Water World Italy ? la divisione della societ? DiCamillo che opera da anni nel settore dei serbatoi e delle cisterne per acque potabili e piovane e degli impianti di depurazione delle acque reflue ???
