

# WHAT DOES IT TAKE TO EXPORT ENERGY STORAGE BATTERIES TO EUROPE

Can battery energy storage solve Europe's energy challenges? In order to deploy renewables and to release their potential for ensuring a stable and secure energy supply, Europe needs to work to overcome the intrinsic limits of renewables. One solution to these challenges is Battery Energy Storage.

What are the benefits of battery energy storage in Europe? Increasing the use of renewables in the energy mix allows energy imports to be reduced, with clear benefits for Europe's energy independence and security. The decarbonisation of the energy mix and reductions in overall CO<sub>2</sub> emissions are other clear, positive outcomes of an increased use of Battery Energy Storage in Europe.

Should battery energy storage be regulated in the EU? The EU's legislative and regulatory framework should guarantee a fair and technology-neutral competition between battery technologies. Several mature technologies are available today for Battery Energy Storage, but all technologies have considerable development potential.

Why do we need battery energy storage systems? This intermittency challenges the grid's energy reliability. If the global energy system will be 70% reliant on renewable energy sources by 2050, this challenge will get exponentially larger. Herein lies the crucial role of battery energy storage systems—they are not just beneficial but necessary for the future stability of our energy supply.

Are batteries a solution to energy storage? Batteries provide short-term storage (a few hours) with high-power (GW). Together, PHES and batteries solve energy storage. The global pumped hydro atlas lists 820,000 sites in the size range of 2-5000 GWh with a combined storage of 86 million Gigawatt-hours. This is equivalent to 2 trillion electric vehicle batteries.

# WHAT DOES IT TAKE TO EXPORT ENERGY STORAGE BATTERIES TO EUROPE

What is battery energy storage? Battery Energy Storage can support customer loads and provide backup power throughout an entire power outage period, working as an uninterruptible power supply unit (UPS). This service is particularly useful in areas with weak, low-voltage grids.

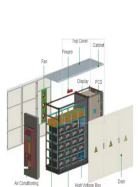

When preparing batteries for shipping, examine the Watt-hours rating, which indicates the battery energy capacity. Higher Watt-hour batteries require greater precautions. Check the State of Charge (SOC), which is the ???

However, if you also have a home battery installed, your export payments will be estimated at 50% of what you generate. This is because your export meter cannot determine whether electricity exported from your battery was originally ???

Each year, EES Europe, Europe's largest and most international exhibition for batteries and energy storage systems, provides a networking opportunity for the industry's key players, such as manufacturers, distributors, project developers, ???

# WHAT DOES IT TAKE TO EXPORT ENERGY STORAGE BATTERIES TO EUROPE

A 5kWh battery will have 5000 watts hours, or 5 kilowatt hours, of storage energy. A fully charged battery will be able to maintain the average fridge (200W) for approximately 1 day. Sometimes your power distributor can put ???

Demand for batteries for electric vehicles (EVs) has grown significantly, and the EU has struggled to meet this demand through domestic production alone. When it comes to battery supply ???

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

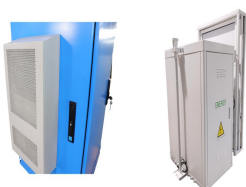

- Energy Storage Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

Batteries and the materials that go into making them are central to our effort to clean up cars, trucks and buses as well as to expand renewable energy networks. A year ago, as T&E estimated that two-thirds of Europe's ???

It compares this with the raw materials needed to run a fossil fuel car to show that electric car batteries need significantly less raw materials. The report also shows that on a systemic level Europe's overreliance on oil imports ???

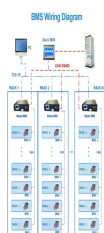

Octopus Energy doesn't need to have installed the solar panels or battery though. This import-and-export tariff allows you to generate, import and store energy, which Octopus will export at a time when prices are highest, ???

# WHAT DOES IT TAKE TO EXPORT ENERGY STORAGE BATTERIES TO EUROPE

We're constantly striving to harness the latest thinking in our mission to bring clean, fairly priced power to the people. In February 2018, we launched the world's first time-of-use import tariff, Agile Octopus, letting ???

material efficiency of the battery value chains will lead to reduced extractive activities and overall reduction of the environmental impact. While the EU scores high in relation to the recycling of ???
