

# WHAT HAPPENS IF SOLAR POWER GOES OUT

A grid-tied solar system must be turned off when the power goes out to protect utility workers. However, if you combine your solar system with battery storage, your battery stores excess electricity that your solar panels generate.

If your solar power system is currently tied to the electricity grid, whenever the power goes out for your neighbors, you are bound to experience the same type of interruption. When a backup battery system is installed, the extra power that's generated by your system can be transferred into the battery and then stored over the long term.
