

# XINDA NENGTONG LARGE HEAT STORAGE STATION

What is Ningxia power's energy storage station? On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.

What is the largest grid-forming energy storage station in China? This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

Is energy storage a key innovation field in China? In November 2014, the State Council of China issued the Strategic Action Plan for energy development (2014-2020), confirming energy storage as one of the 9 key innovation fields and 20 key innovation directions.

What is the energy storage demand in China? Energy storage demand in China is without a doubt. Currently, China is carrying out the urbanization of centrality, intelligence, green and low carbon. Among them, the application of DG, smart micro-grid, EV, and the intelligent management of power grid all need energy storage , , , .

Why are China's energy storage devices mainly installed in the demand side? China's energy storage devices are mainly installed in the demand side with the proportion of 46% and most of them are DG and micro-grid projects. One reason is that China's large electricity demand brought by the large population and growing economy leads a big peak-valley difference.

# XINDA NENG TONG LARGE HEAT STORAGE STATION

Does China's energy storage industry have a comprehensive study? However, because of the late start of China's energy storage industry, the comprehensive study for the whole industry is very few. We found a review which provided a relatively comprehensive analysis of the technical and economic issue of it. Compared with other studies, its research has a good comprehensiveness.
