

# XTG GREEN ENERGY FIJI

Is Fiji introducing renewables to generate green power? As a developing nation with its increasing energy demands, Fiji is in the process of introducing renewables to generate green power to minimize its reliance on fossil fuels and to minimize greenhouse emissions. The paper focuses on green power generation with the available renewables.

What is Fiji's future power generation? Hydropower, bioenergy, solar energy and wind power are the prominent renewables on which Fiji's future power generation would be based. The share of renewable energies in the urban power generation in the calendar year 2019 was about 53% (561.96 million units). 55.9% of the Fijian population lives in rural areas and settlements.

How much wind power can Fiji generate? Viti Levu and Vanua Levu are capable of generating wind power of 9 kW /m. The high energy coastlines can also be found here with similar levels to that of the southern coast of Kadavu. Reddy and Ahmed reported that Taveuni island in Fiji could generate 12 kW m ??? 1 wave energy monthly. 2.3. Tidal energy

How much carbon dioxide is emitted in Fiji? In 2015, 1925 million metric tonnes of carbon dioxide was emitted which was 21% less than that of 2005. The Government of Fiji is committed to utilize natural renewable energy resources available and generate 99% green electrical power by 2030.

Why is electricity Fiji Limited a good company? Electricity Fiji Limited has been working wisely by considering the geographic advantages to produce a liable mix of renewable energy projects across the country, using tailor-suited solutions where they best fit.

# XTG GREEN ENERGY FIJI

How is energy provided in Fiji? The provision of energy in Fiji is provided through electrical power grids consisting of microgrids installed in Government facilities and community-run in rural areas.

Furthermore, diesel generators and solar home systems also are utilized as a way of power providers.
