Where is Yingcheng energy storage station? An aerial drone photo taken on April 9, 2024 shows a view of the 300 MW compressed air energy storage station in Yingcheng, central China's Hubei Province. (Xinhua/Cheng Min) BEIJING, May 24 (Xinhua) -- U.S. carmaker Tesla broke ground on a mega factory in Shanghai on Thursday to produce its energy-storage batteries Megapack.

What will Shanghai's energy-storage project do? Zhuang Mudi, deputy secretary-general of the Shanghai municipal government, said the project will help drive the development of the new energy-storage industry, as well as the green and low-carbon transformation of Shanghai.

Can new energy storage promote green and low-carbon development? This year's government work report noted the development of new energy storage as one of the measures to promote green and low-carbon development. New energy storage refers to energy-storage technologies other than conventional pump storage. It offers advantages such as a short construction period, flexible layout and fast response.

When does an energy-storage system charge? An energy-storage system charges when wind power or photovoltaic power generates a large volume of electricity or when the power consumption is low, and it discharges otherwise.
