News Elisa's Distributed Energy Storage (DES) solution will allow Åland Islands' operator Ålcom to use and store solar energy, reducing its reliance on the national grid. This week, Ålcom, a telecoms operator from Finland's autonomous Åland Islands, has revealed a new deal with Elisa to use the latter's DES solution, leveraging solar panels deployed at

Ideally tilt fixed solar panels 49° South in Mariehamn, Åland Islands. To maximize your solar PV system's energy output in Mariehamn, Åland Islands (Lat/Long 60.1017, 19.9548) throughout the year, you should tilt your panels at an angle of 49° South for fixed panel installations.

An interesting fact is that Åland is the world's most solar tracker-dense area with around 70 solar trackers installed on the islands in the last ten years by the same team that now leads the development of Superstate's new solar tracker Solarmotion. Solarmotion comes with a built-in wind protection mode for better safety in strong winds.

Åland's 6,700 islands are clustered in the middle of the Baltic Sea, offering a cultural fusion of Sweden and Finland. Åland has one city, Mariehamn, and a living, breathing countryside and archipelago. For the past 100 years, Åland has been an autonomous region in Finland.

"We are delighted to add solar energy to our operations with Elisa DES. This investment is part of Ålcom's continued commitment to sustainability. Including solar production in the energy mix helps us reduce costs and gain flexibility and means to cope with variability and uncertainty in energy generation, demand, and grid availability.
